Computer Generated Logs for Operable Unit Investigations

Robert Benedetti, Associate General Manager  
Environmental Restoration Management  
EG&G Rocky Flats, Inc

Attached please find a request from the state for digital logger files produced during Operable Unit investigations, as agreed to in an April 16, 1992 meeting between EPA, CDH, PRC, DOE and EG&G. The latest digital files transmitted to DOE for Operable Units 1 and 2 are draft versions, dated July 1, 1992. If these logger files are now in final form, please transmit them immediately to DOE. If the files are not finalized, provide the most recent version and a proposed date of finalization.

Several Operable Units are currently in the process of gathering data. Geologic data should now be available for Operable Units 4, 5, 6, and 7. Last year, a CPAF criteria was established requiring the logger files be available within two weeks of hole completion. Although this criteria was met by the sitewide drilling program, logs were not received in a timely manner from RPM. Most logs were submitted before the June CPAF deadline, but the need for real time data was not met. DOE is concerned that this situation has not improved. We are requesting, along with the Operable Units 1 and 2 logger files, a proposal for avoiding these future delays in the transmittal of hard copy and digital logs to DOE.

If you have any questions or comments, please contact Jen Pepe of my staff at extension 2184.

  
James K. Hartman  
Assistant Manager  
for Environmental Management
